We love to find good homes for abandoned and unwanted pet pigs but we are also cautious and want the new owner to realize the long-term commitment they are making. The average size of a mature pig at the age of 4-5 yrs is between 90 and 150#, even up to 300 lbs sometimes. Pigs have special needs so you really need to have done your homework in finding out about them and to know up front what you will need to do and have to secure a good home for one. We will gladly mail you a free packet of information upon request. If you have any questions, please feel free to ask and if we don't know the answer, we'll find the answer. It is important that you make an informed decision for it is a long term commitment. Again, please be sure you really want a pig as a pet. For the right people they make wonderful pets but for others they become a nightmare, so just please be sure and do your homework first. Thank you very much for your interest in adopting a pigpet!
